## Performance in FY2020

Inditex continues to expand its global, fully integrated platform underpinned by the key strategic pillars of store & online integration, digitalisation and sustainability.

Inditex's FY2020 performance has been materially impacted by Covid-19 with temporary store closures. Online sales have seen outstanding growth in FY2020, benefiting from the single inventory position.

As at 31 January 2021, 30% of stores were in full lockdown (versus 8% on 31 October 2020) and 52% had restrictions. The chart below illustrates the number of stores with sales over the period on a weekly basis.

Collections were very well received by our customers. Our supply chain continued to operate normally due to the flexibility of our business model based on proximity sourcing and the single inventory position. Inventory integration proved to be pivotal during this period. We have also implemented initiatives to adjust operating expenses. The flexibility of the business model has been key to the operational and financial performance.

The chart below shows the monthly sales performance in the period versus last year.

Inditex generated a strong operating performance. In FY2020, net sales reached €20.4 billion (€28.3 billion in FY2019). Sales in constant currencies decreased 24.5%. The chart shows the full year and 2H2020 results:

€ million	FY2020	20/19	2H2020	20/19
Net sales	20,402	-28%	12,369	-20%
Gross profit	11,390	-28%	6,878	-19%
EBITDA	4,552	-40%	3,066	-26%

Despite the disruption caused by the lockdowns and restrictions, the strength of the business model is reflected in the high sales productivity. Trading hours were down 25.5% versus 2019. Total store and online sales in constant currency were down 24.5% versus 2019. The table below illustrates this performance.

	2020	2H20	4Q20
Trading hours	(25.5%)	(15%)	(23.5%)
Total store & online sales growth	(24.5%)	(15%)	(19.5%)
