

Philips delivers Q1 sales of EUR 3.8 billion, with 9% comparable sales growth; net income amounts to EUR 40 million and Adjusted EBITA margin improves 390 basis points to 9.5%

Amsterdam, April 26, 2021

First-quarter highlights

- Following the agreement to sell the Domestic Appliances business to global investment firm Hillhouse Capital, this business is reported as a discontinued operation as of Q1 2021. Consequently, sales and results from the Domestic Appliances business are no longer included in the results of continuing operations.
- Group sales amounted to EUR 3.8 billion, with 9% comparable sales growth
- Comparable order intake decreased 5%, with double-digit growth in the Diagnosis & Treatment businesses and a double-digit decline in the Connected Care businesses on the back of 80% growth in Q1 2020
- Income from continuing operations was a loss of EUR 34 million. Excluding the impact of a provision related to precautionary actions to address a component quality issue, income from continuing operations improved by EUR 139 million year-on-year. Income from continuing operations was EUR 17 million in Q1 2020.
- Adjusted EBITA increased to EUR 362 million, or 9.5% of sales, compared to EUR 208 million, or 5.6% of sales in Q1 2020
- Operating cash flow improved to EUR 321 million, compared to EUR 181 million in Q1 2020
- Free cash flow was EUR 169 million, compared to an outflow of EUR 15 million in Q1 2020

Frans van Houten, CEO

"Despite the ongoing impact of COVID-19, our performance gained momentum with a strong 9% comparable sales growth and profitability improvement in the first quarter, with all business segments and markets contributing. We are encouraged by the strong 11% comparable order intake growth for the Diagnosis & Treatment businesses, and the strengthening performance of the Personal Health businesses. At the same time, the Connected Care businesses continued to successfully convert their strong order book, while comparable order intake decreased 27%, as anticipated following the 80% order intake growth for patient monitors and hospital ventilators in Q1 2020.

Our growth momentum is driven by our portfolio of innovative solutions, for example in the areas of precision diagnosis, image-guided therapy, and telehealth. Moreover, we continued to add long-term strategic partnerships with hospitals on the back of more than 50 new partnerships we signed in 2020. This illustrates our ability to meet the needs of today's hospital leaders, across the globe, as they plan for the future.

In line with our plans, we signed an agreement to sell the Domestic Appliances business, which concludes our major divestments. We are pleased that we have found a good home for this business and we look forward to a successful partnership with the new owner, Hillhouse Capital. We are also pleased to have completed the acquisition of BioTelemetry and Capsule Technologies, which will further drive our transformation into a solutions company, and in particular further strengthen our position to improve patient care across care settings for multiple diseases and medical conditions.

Regretfully, we have identified a quality issue in a component that is used in certain sleep and respiratory care products, and are initiating all precautionary actions to address this issue, for which we have taken a EUR 250 million provision.

Looking ahead, while we continue to see uncertainty related to the impact of COVID-19 across the world, we see increased demand in the Diagnosis & Treatment and Personal Health businesses. We now plan to deliver low-to-mid-single-digit comparable sales growth for the Group in 2021 (compared to the earlier projection of low-single-digit growth), with an Adjusted EBITA margin improvement of 60-80 basis points."

Business segment performance

All business segments delivered comparable sales growth and increased Adjusted EBITA margin in the quarter, driven by sales growth and results of our productivity programs.

The Diagnosis & Treatment businesses recorded 9% comparable sales growth, with double-digit growth in Diagnostic Imaging, high-single-digit growth in Ultrasound, and mid-single-digit growth in Image-Guided Therapy. Comparable order intake showed 11% growth, driven by Diagnostic Imaging and Image-Guided Therapy. The Adjusted EBITA margin increased to 8.7%.

Comparable sales in the Connected Care businesses increased 7%, led by double-digit growth in Hospital Patient Monitoring. Comparable order intake showed a 27% decrease, as anticipated following the steep 80% increase in Q1 2020. The Adjusted EBITA margin increased to 12.8%.

The Personal Health businesses recorded comparable sales growth of 17%, with double-digit growth in Personal Care and mid-single-digit growth in Oral Healthcare. The Adjusted EBITA margin increased to 14.3%.

Philips' ongoing focus on innovation and partnerships resulted in the following key developments in the quarter:

- Philips signed multiple new long-term strategic partnerships in North America, Europe and Asia, including a 5-year agreement with Spanish healthcare group Vithas. Philips will provide Vithas with diagnostic imaging systems combined with advanced informatics, and image-guided therapy solutions, to enhance patient care.
- Strong traction for Philips' diagnostic and therapeutic catheter portfolio, which includes innovations such as Philips' coronary and peripheral IVUS catheters, coupled with the resumption of elective procedures, resulted in a return to double-digit growth for the Image-Guided Therapy Devices business in the quarter.
- Philips received US FDA clearance for its SmartCT (Cone Beam CT) application for the Azurion image-guided therapy system, which provides interventionalists with CT-like 3D images to enhance procedural outcomes and fits seamlessly into existing workflows. An industry-first, Philips also introduced ClarifEye Augmented Reality Surgical Navigation, advancing minimally invasive spine procedures in the hybrid operating room.
- Philips expanded its Incisive CT platform with the launch of the AI-enabled Precise Suite, delivering smart workflows from image acquisition to reporting, with image reconstruction, automated patient positioning, and real-time interventional guidance to drive precision in dose, speed, and image quality.
- Philips produced its 100 millionth OneBlade, just 5 years after its launch in 2016. The Philips OneBlade has disrupted shaving markets worldwide, creating a new category for shaving, trimming, and edging. Philips also introduced the Lumea IPL 9000 series with SenselQ technology for personalized hair removal, which is available through a Try&Buy subscription model in Germany, the Netherlands and other countries.
- Expanding its remote patient management offering, Philips introduced the Medical Tablet, a portable monitoring kit designed to help clinicians remotely monitor larger patient populations during emergency situations. This new offering, which is available in North America, Europe and Japan, provides remote access to patient data to improve workflows and better manage increased patient volumes.

Cost savings

In the first quarter, procurement savings amounted to EUR 44 million. Overhead and other productivity programs delivered savings of EUR 53 million.

Regulatory update

Philips has determined from user reports and testing that there are possible risks to users related to the sound abatement foam used in certain of Philips' sleep and respiratory care devices currently in use. The risks include that the foam may degrade under certain circumstances, influenced by factors including use of unapproved cleaning methods, such as ozone¹⁾, and certain environmental conditions involving high humidity and temperature. The majority of the affected devices are in the first-generation DreamStation product family. Philips' recently launched next-generation CPAP platform, DreamStation 2, is not affected. Philips is in the process of engaging with the relevant regulatory agencies regarding this matter and initiating appropriate actions to mitigate these possible risks. Given the estimated scope of the intended precautionary actions on the installed base, Philips has taken a provision of EUR 250 million.

¹⁾ Potential Risks Associated With The Use of Ozone and Ultraviolet (UV) Light Products for Cleaning CPAP Machines and Accessories: [FDA Safety Communication](#)

Domestic Appliances

On March 25, 2021, Philips announced that it had signed an agreement to sell its Domestic Appliances business. As of the first quarter of 2021, the Domestic Appliances business (which was previously part of the Personal Health segment) is reported as a discontinued operation. Philips will continue to consolidate Domestic Appliances under International Financial Reporting Standards (IFRS) until the sale is completed. Further details of the restatement have been published on the Philips Investor Relations website and can be accessed [here](#). The Personal Health segment in this report is presented without the results of the Domestic Appliances business.

Conference call and audio webcast

Frans van Houten, CEO, and Abhijit Bhattacharya, CFO, will host a conference call for investors and analysts at 10:00 am CET today to discuss the results. A live audio webcast of the conference call will be available on the Philips Investor Relations website and can be accessed [here](#).

¹⁾ Comparative figures in this report have been restated, refer to 'Presentation' in [Forward-looking statements and other important information](#).

²⁾ Non-IFRS financial measure. Refer to [Reconciliation of non-IFRS information](#), of this document.

³⁾ Shareholders refers to shareholders of Koninklijke Philips N.V.

- Comparable sales growth was 9%, with double-digit growth in the Personal Health businesses and high-single-digit growth in the Diagnosis & Treatment and Connected Care businesses.
- Comparable order intake declined by 5%, with double-digit growth in the Diagnosis & Treatment businesses, offset by a double-digit decline in the Connected Care businesses, as anticipated following the exceptional demand for patient monitors and hospital ventilators in Q1 2020.
- Adjusted EBITA increased by EUR 154 million and the margin increased by 390 basis points compared to Q1 2020, driven by sales growth and productivity measures.
- Amortization of acquired intangible assets includes an impairment of EUR 55 million related to technology assets.
- Restructuring, acquisition-related and other charges amounted to EUR 301 million, compared to EUR 116 million in Q1 2020. Q1 2021 includes a provision of EUR 250 million related to precautionary actions to address a component quality issue, restructuring charges of EUR 19 million, acquisition-related charges of EUR 30 million offset by a EUR 41 million gain related to the re-measurement of a contingent consideration liability, and EUR 22 million of separation costs related to the Domestic Appliances business.
- Financial income and expenses resulted in an expense of EUR 6 million, compared to EUR 19 million in Q1 2020. Q1 2021 includes gains from the increase in value of our minority participations.
- Income tax benefit decreased by EUR 14 million year-on-year, mainly due to a one-off non-cash benefit from a decrease in tax rate in Q1 2020, partly offset by lower income in Q1 2021.
- As of Q1 2021, Philips reports the results of the Domestic Appliances business as a discontinued operation. Net income from discontinued operations increased by EUR 51 million year-on-year, mainly due to sales growth in the Domestic Appliances business.
- Net income was flat year-on-year, with a provision related to product quality and higher amortization, offset by an increase in net income from discontinued operations.

Sales per geographic cluster in millions of EUR unless otherwise stated

	Q1 2020	Q1 2021	% change	
			nominal	comparable ¹⁾
Western Europe	733	791	8%	9%
North America	1,585	1,534	(3)%	2%
Other mature geographies	424	454	7%	12%
Total mature geographies	2,741	2,779	1%	5%
Growth geographies	951	1,048	10%	21%
Philips Group	3,693	3,827	4%	9%

¹⁾ Non-IFRS financial measure. Refer to [Reconciliation of non-IFRS information](#), of this document.

- Sales in growth geographies increased by 21% on a comparable basis, driven by double-digit growth in all main markets. In mature geographies, sales increased by 5% on a comparable basis, with high-single-digit growth in Western Europe, low-single-digit growth in North America, and double-digit growth in other mature geographies.

Amounts may not add up due to rounding

Cash and cash equivalents balance in millions of EUR

¹⁾ Non-IFRS financial measure. Refer to [Reconciliation of non-IFRS information](#), of this document.

- Sales decreased by EUR 14 million, mainly due to lower royalty income.
- The increase in Adjusted EBITA in line item Other mainly relates to movements in environmental provisions.
- Restructuring, acquisition-related and other charges amounted to EUR 33 million, compared to EUR 2 million in Q1 2020. Q1 2021 includes EUR 22 million of separation costs related to the Domestic Appliances business. In Q2 2021, restructuring, acquisition-related and other charges are expected to total approximately EUR 35 million.

Forward-looking statements and other important information

Forward-looking statements

This document and the related oral presentation, including responses to questions following the presentation, contain certain forward-looking statements with respect to the financial condition, results of operations and business of Philips and certain of the plans and objectives of Philips with respect to these items. Examples of forward-looking statements include: statements made about our strategy; estimates of sales growth; future Adjusted EBITA; future restructuring and acquisition-related charges and other costs; future developments in Philips' organic business; and the completion of acquisitions and divestments. By their nature, these statements involve risk and uncertainty because they relate to future events and circumstances and there are many factors that could cause actual results and developments to differ materially from those expressed or implied by these statements.

These factors include but are not limited to: changes in industry or market circumstances; economic, political and societal changes; Philips' increasing focus on health technology and solutions; the successful completion of divestments such as the disentanglement and divestment of our Domestic Appliances businesses; the realization of Philips' objectives in growth geographies; business plans and integration of acquisitions; securing and maintaining Philips' intellectual property rights, and unauthorized use of third-party intellectual property rights; COVID-19 and other pandemics; breaches of cybersecurity; IT system changes or failures; the effectiveness of our supply chain; challenges to drive operational excellence, productivity and speed in bringing innovations to market; attracting and retaining personnel; future trade arrangements following Brexit; compliance with regulations and standards including quality, product safety and data privacy; compliance with business conduct rules and regulations; treasury risks and other financial risks; tax risks; costs of defined-benefit pension plans and other post-retirement plans; reliability of internal controls, financial reporting and management process. As a result, Philips' actual future results may differ materially from the plans, goals and expectations set forth in such forward-looking statements. For a discussion of factors that could cause future results to differ from such forward-looking statements, see also the Risk management chapter included in the [Annual Report 2020](#).

Philips has taken a provision of EUR 250 million related to precautionary actions to address a component quality issue, which is Philips' current best estimate for the expected related costs. The actual amounts of the costs, are dependent on a number of factors the outcome of which is uncertain, and, as a consequence, the amount of the provision may change at a future date.

Third-party market share data

Statements regarding market share, contained in this document, including those regarding Philips' competitive position, are based on outside sources such as specialized research institutes, industry and dealer panels in combination with management estimates. Where information is not yet available to Philips, market share statements may also be based on estimates and projections prepared by management and/or based on outside sources of information. Management's estimates of rankings are based on order intake or sales, depending on the business.

Market Abuse Regulation

This press release contains inside information within the meaning of Article 7(1) of the EU Market Abuse Regulation.

Use of non-IFRS information

In presenting and discussing the Philips Group's financial position, operating results and cash flows, management uses certain non-IFRS financial measures. These non-IFRS financial measures should not be viewed in isolation as alternatives to the equivalent IFRS measure and should be used in conjunction with the most directly comparable IFRS measures. Non-IFRS financial measures do not have standardized meaning under IFRS and therefore may not be comparable to similar measures presented by other issuers. A reconciliation of these non-IFRS measures to the most directly comparable IFRS measures is contained in this document. Further information on non-IFRS measures can be found in the [Annual Report 2020](#).

Fair value information

In presenting the Philips Group's financial position, fair values are used for the measurement of various items in accordance with the applicable accounting standards. These fair values are based on market prices, where available, and are obtained from sources that are deemed to be reliable. Readers are cautioned that these values are subject to changes over time and are only valid at the balance sheet date. When quoted prices or observable market data are not readily available, fair values are estimated using appropriate valuation models and unobservable inputs. Such fair value estimates require management to make significant assumptions with respect to future developments, which are inherently uncertain and may therefore deviate from actual developments. Critical assumptions used are disclosed in the [Annual Report 2020](#). In certain cases independent valuations are obtained to support management's determination of fair values.

Presentation

All amounts are in millions of euros unless otherwise stated. Due to rounding, amounts may not add up precisely to totals provided. All reported data is unaudited. Financial reporting is in accordance with the accounting policies as stated in the Annual Report 2020.

In 2020, Philips revised the definition of net finance expenses used in the calculation of Adjusted income from continuing operations attributable to shareholders, to exclude fair value movements of limited life fund investments recognized at fair value through profit and loss. This change leads to more relevant information as the fair value movements are not indicative of Philips' performance. The fair value movements do not represent cash items. Philips believes making this change is helpful for investors to evaluate Philips' performance.

Per share and weighted average share calculations have been adjusted for all periods presented to reflect the issuance of shares for the share dividend in respect of 2019.

As announced on March 25, 2021, Philips has signed an agreement to sell its Domestic Appliances business. As of the first quarter of 2021, the Domestic Appliances business is presented as a discontinued operation. In this report, comparative results have been restated to reflect the treatment of the Domestic Appliances business as a discontinued operation. Further details of the restatement have been published on the Philips Investor Relations website and can be accessed [here](#).

Prior-period amounts have been reclassified to conform to the current-period presentation; this includes immaterial organizational changes.

Reconciliation of non-IFRS information

Certain non-IFRS financial measures are presented when discussing the Philips Group's performance:

- Comparable sales growth
- EBITA
- Adjusted EBITA
- Adjusted income from continuing operations attributable to shareholders
- Adjusted income from continuing operations attributable to shareholders per common share (in EUR) - diluted (Adjusted EPS)
- Adjusted EBITDA
- Free cash flow
- Net debt : group equity ratio

For the definitions of the non-IFRS financial measures listed above, refer to chapter 12.3, Reconciliation of non-IFRS information, of the [Annual Report 2020](#) and to the [Forward-looking statements and other important information](#).

Comparable order intake is presented when discussing the Philips Group's performance. For the definition of this measure, refer to chapter 12.4, Other Key Performance Indicators, of the [Annual Report 2020](#).
